Assessment for **Speaking**

$100

Assessment for **Intellikeys**

$100
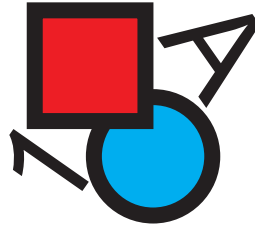

Assistive Technology
Language Assessment Primary
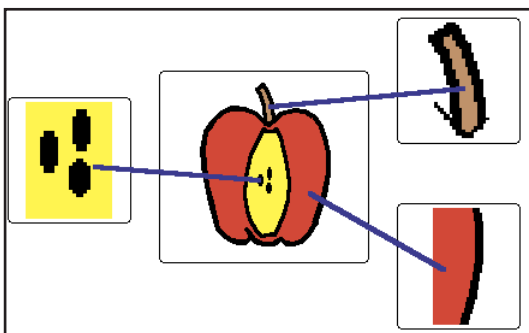

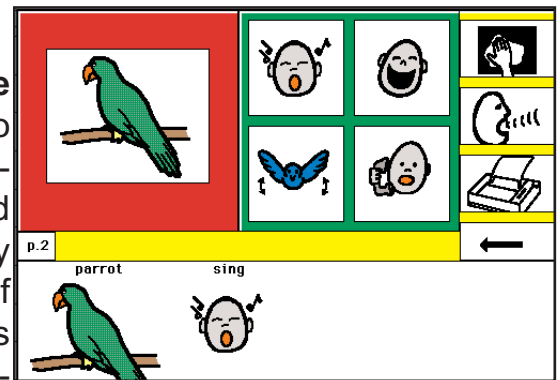

Have you ever tried to assess a student with little or no speech? With many tests it is almost impossible, but now with today's technology many new avenues have been made available for use in testing.

The **Assistive Technology Language Assessment** is an informal assessment designed to assess skills such as syntax, semantics, auditory association, and auditory processing. Unlike other standard assessments this assessment is geared specifically toward those students needing an alternative method of communication and/or access. Using Mayer Johnson's picture communication symbols as well as their augmentative communication program, **Speaking DynamicallyPro**, students are able to access answers through the use of a single switch, touchwindow, or mouse. A total of 145 Speaking Dynamically boards have been put together to form a thorough on screen interactive assessment of a child's early language skills.

For younger and more physically challenged students the test has also been adapted for use with the **Intellikeys Adaptive Keyboard**. 93 overlays were designed to perform the same function as the interactive version mentioned above.Complete with flashcards this form of the assessment can be used and accessed by hand or through alternative access such as head pointers.

Subtests, complete with forms, were designed to measure receptive and expressive language skills, to identify strengths and weaknesses in language and to measure a students ability to understand and communicate through pictures. The test gives students audio feedback as well as in many cases a voice with which to answer questions. Although the audio feedback is not necessary for all students it provides a verbal reinforcement that allows students to achieve and answer questions more accurately.

Early Childhood Intellipics Activities

$75

Stimulate Communication

Cooking

Peanut Butter Face

banana, marshmallows, pretzel, nose, eyes, mouth

Art

Let's paint with gadgets!!!

cookie cutters, sponge, whisk, cup, fork, spatula, straw

Concepts & Vocabulary

Let's count...

eggs, nails, bears, clocks, pigs

1 2 3 4 5 6 7 8 9 10

Counting

Let's count

blocks, crayons, scissors, glue, pencils

1 2 3 4 5 6 7 8 9 10

Made by teachers, these are tried and true activities actually developed and used in a PPCD classroom. Students of all abilities love these lessons!

Using these boards in a group time increases attention to task, teaches turn taking skills, enables kids who are non-verbal to partcipate and makes learning fun.

Using these boards independently during center time reinforces basic classroom skills.

These activities were designed using Intellipics. They can be accessed through the use of a mouse, touchwindow or an Intellikeys Adaptive Keyboard.

Intellipics Player
&
Overlay Printer
Included
FREE!
