Nicolette Brigham, Ph.D. (*University of Washington*)

William R. Jenson, Ph.D. (*University of Utah*)

As professional educators, we understand the pressure to keep pace with an exploding special education population in the face of shrinking budgets. Teachers are struggling to balance student needs with Federal IDEA mandates, Common Core Standards, and maximizing Inclusion.

### We can help.

Through technology, our breakthrough new programs are simple to implement, powerfully effective, and won't increase the strain of hard working teachers. We make it easy to create individualized ABA-based curricula aligned with the Common Core Standards, manage data on-line, get automated reports for IEP meetings, and even train paraprofessional staff and parents in the latest research-based interventions.

We are the leading special educational treatment platform for professional educators. We can help you meet your challenges faster and easier.

# Easy to implement. Powerfully effective.

## Curriculum

Video-based, Special Ed specific curriculum

Educators can access over 1,500 video-based exercises across 12 skill areas showing you how to teach each lesson step-by-step.

Adapt program using detailed lesson plans developed by Special Educators and Board Certified Behavior Analysts.

Stay current with best practices and new research findings as the curriculum is constantly expanding and aligned with Common Core Standards.

## Assessment

Quickly generate an individualized plan based on student's needs

Complete a brief skills checklist to assess current level of performance and generate individualized program goals.

Access evidence-based teaching interventions and follow a customized curriculum path based on ongoing assessment.

Integrate your school's existing assessment by manually managing our on-line curriculum.

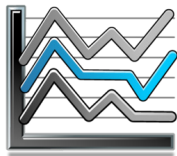

## Training

Translate training into staff and student performance

Train staff and parents on Applied Behavior Analysis using video-based training modules.

Ensure program fidelity and staff knowledge with training tests performance reports.

Keep staff trained on the latest evidence-based practices by bringing it right to their classrooms.

## Data Tracking

Track and monitor student performance data

Record results from teaching sessions and have it automatically graphed for ongoing assessment.

Easily manage data and generate automated progress reports on-line.

Enhance collaboration and accountability by tracking performance across multiple staff and settings.

## Behavior

Effective tools for Behavior Intervention Planning

Utilize Functional Behavior Assessment to help determine why behaviors are occurring.

Automate data tracking for side-by-side treatment phase comparisons.

Share behavior strategies with IEP team members in real time.

## IEP Builder

Customizable goal bank linked to the Rethink Autism curriculum

Save time in generating the IEP goals, which are seamlessly aligned with the Rethink Curriculum.

Individualize a learning plan for each student, driven by the Rethink Assessment.

Automates reporting for IEP meetings and progress reviews. And makes it easy to implement the IEP, with step-by-step video lessons showing how to address each goal using research-based teaching strategies.
