

Copying Videos to Your Computer

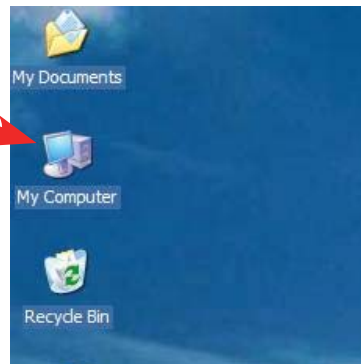

1. Many times a camera or other media device will pop up asking you to open the folder to view the files.

See Below!!!

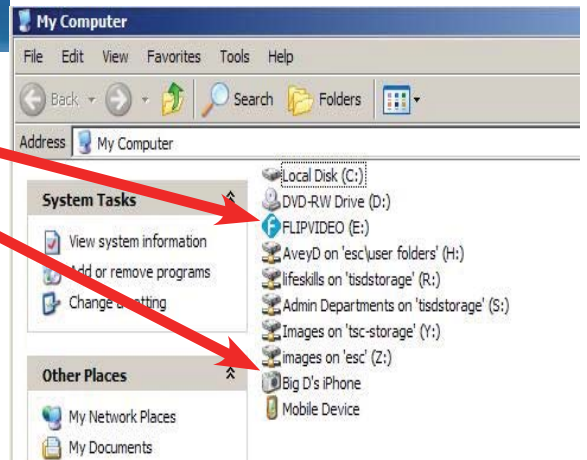

2. OR ...If the above does not happen with your computer you can

Double click on My Computer

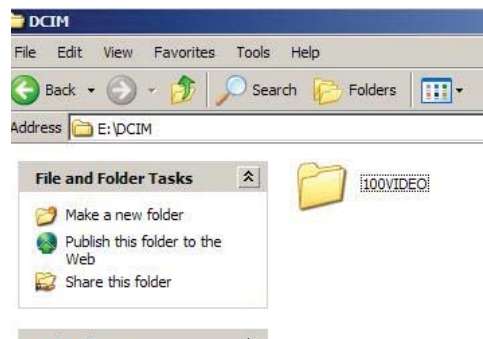

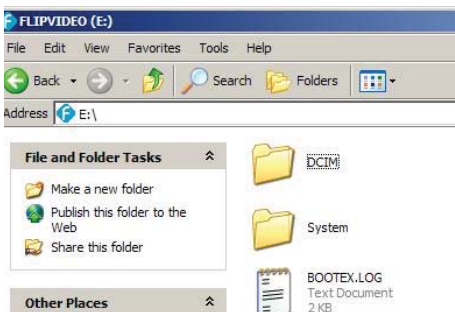

Double click on the drive that has your files Iphone or Flip or other media disk

3. There may be folders on the media disk that contain the videos

Examples: DCIM or 100Video

4. Create a new folder to move video files to.

- a. Right click on the desktop
- b. Drag down to New and over to Folder

5. Name the folder

6. Drag videos from camera or media disk to the new folder
